June 24-July 1 Sun-Fri 4:30 p.m.-9:30 p.m., Sat 10:00 a.m.-6:00 p.m.

ALT 213 Director: David Mengel

Knights in shining armor, bearded barbarian raiders, bow-wielding vigilantes in green tights and a cart-pushing cretin admonishing his neighbors to "bring out your dead"—all these are well-known modern images of the Middle Ages, made familiar through film. For most Americans, film provides the primary understanding of these strange centuries of European history. The Middle Ages seem to us at once terribly romantic (think of chivalrous knights) and horribly uncivilized (think of "medieval" table manners).

This class explores modern popular imaginings of the Middle Ages through film. We view several feature-length films and numerous clips, interspersed with readings from and about the Middle Ages. Together we discuss and analyze both the texts and films. Films range from "Monte Python" to "The Seventh Seal" and "The Name of the Rose." There are plenty of Robin Hood, Crusades and of Joan of Arc portrayals.

Adapting Teaching Techniques to Learning Styles

EDWS 501-W1 (50480) Two credit hours

June 6-10 Mon-Thur 8:30 a.m.-3:30 p.m., Fri 8:00 a.m.-12:30 p.m.

ALT 222

Director: Margaret Stier Guest Speaker: Julie LaMothe

"Learning styles" is often misunderstood; demystify "learning styles" by experiencing an *update*. Stier has toured schools using the program, and has details/pictures of learning styles "in action" in current classroom situations. This seminar presents a hands-on opportunity for participants to explore the fascinating and practical Dunn Model of Learning Styles and Howard Gardiner's "Theory of Multiple Intelligences." Every student, young or old, is an individual with particular modality strengths, which must be understood and used to accomplish maximum learning. Using learning style theory does not mean one-on-one tutoring: Group-learning techniques are experienced as participants learn about themselves and students as active learners.

Topics include learning style elements, construction of content area materials, analyzing participants' teaching styles as well as learning styles, multisensory memorization, interpretation of student profiles, applications to homework, teaching global students, characteristics of the gifted, approaches for tactile-kinesthetic children, juggling varied learning styles, time management, understanding of mini-view of learning-style research, sharing successful programs and implications for critical thinking.

Who should attend? Anyone interested in helping children in grades 1-12, and college/adult learners. For more information contact Stier 859 491-3359.

America Through the Lens: Hollywood As Cultural Messenger

HIST 286 (50489)/EDWS 286 (50490)/COMM 297-W1 (50491)

Two credit hours

July 25-29 Mon-Fri 4:00 p.m.-9:30 p.m. ALT B11

Director: Robert Cotter

This course is built on the premise that every Hollywood film and television narrative, though created for reasons of entertainment and profit (and sometimes art), is in fact a cultural artifact; a representation of the values, myths, ideologies and assumptions of the culture that produced it. Delivered to us by powerful mass communication technologies, these narratives shape our collective consciousness, affirming accepted ideological and cultural beliefs/myths and, sometimes, modifying them.

Hollywood films and television programs are analyzed in order to both identify the cultural and historical messages they contain and to determine how and why they carry these messages. To facilitate this effort, the formulas and conventions of Hollywood genres (westerns, musicals, family melodramas, film noir, horror, etc.) are examined. This understanding of genre serves as a primary analytical tool as we deconstruct the films and television programs studied in class.

Baseball and American Culture

HIST 287-W1 (50500) Two credit hours

July 11-15 Mon-Fri 4:30 p.m.-9:30 p.m. ALT B11

Director: John Fairfield

"It's our game, that's the chief fact in connection with it: America's game. It 'has the snap, go, fling of the American atmosphere—belongs as much to our institutions, fits into them as significantly, as our constitutions, laws: is just as important in the sum total of our historic life." -Walt Whitman

Commentators have long argued that baseball is a key to understanding American culture and the American character. Over the past two decades historians of the sport have unearthed an enormous amount of material that not only verifies this insight but also allows us to be more precise about the connection between baseball and the development of American culture. This workshop explores the social history of the game using a variety of historical, literary and cinematic sources.

People are paying a lot of attention to their bodies. How are you including the body in your work? The human body provides essential and often overlooked information about the organizing and healing of experience. Its role in perception and expression deserve attention if therapy and education are to thoroughly integrate with cognition, emotion and spirituality.

This course introduces students to theory and principles of body psychology, and teaches ways to use awareness and activity of the body in therapy and education. This knowledge and experience may be integrated into professional life, self-education and personal growth. Local guest practitioners provide examples of their body-oriented work to familiarize students with available resources.

Topics include body therapy theory, observing body activity, body process, resources in the body, empathy for the body, trauma and the body, movement and gesture as communication, ethics of touch and use of the self in therapy. The course encourages increased self-awareness, observation skills and practical techniques using movement, artistic activity and discussion and reflective writing. June 20-24 Mon-Fri 8:30 a.m.-12:30 p.m. ARM 2
Director: Melody D'Ambrosio

This course describes the challenges facing teachers in urban elementary school settings. One of the challenges includes making curriculum more relevant for students whose cultures are not the predominant culture. The impact of trauma on individuals is increasingly noticed. Accidents, surgeries, torture, witnessing violence, as well as neglect and abuse are all traumas. Besides PTSD, therapists find relationships between trauma and DSM-IV diagnoses including ADD/ADHD, bipolar disorder, mood disorders, some personality disorders, as well as learning disabilities and career problems.

This course provides information and experience to help counselors and educators recognize signs of trauma and pursue their understanding of trauma. It proves dialogue with professionals working in the field of trauma to understand different ways of supporting the healing of trauma and its aftermath, and caring for one's self in the process.

It gives specific emphasis to approaches that include the body because of the nervous system damage, which occurs in trauma and needs to be attended to if a thorough treatment is to be designed. These include sensorimotor psychotherapy, EMDR and movement therapy. Presentations, readings, video, art, movement and reflective writing support the learning process. Hollywood: A Social and Cultural History of American Movies

HIST 285 (50540)/COMM 197-W1 (50541) Two credit hours

May 9-13 Mon-Fri 4:30 p.m.-9:30 p.m. ALT B11

Directors: John Fairfield and Bob Cotter

Hollywood has always taken historical themes for some of its most ambitious projects, a trend that has become even more pronounced in the past decade. What has not always been understood is that Hollywood and the development of the American movie industry has been a central element in the social and cultural history of 20th

century America. Thus this workshop has two purposes: to critically examine various film images of American history and, equally important, to place Hollywood and its products in the larger context of 20th century American history.

The workshop includes the screening of five major films and clips from many others. Robert Sklar's "Movie Made America" serves as the primary historical text. Guest speakers focus on specific cinematographic and historical aspects of American filmmaking. The workshop should be particularly useful for secondary teachers interested in enriching and broadening their use of film in the curriculum.

In this course we study literature by women and feminist theoretical approaches to women's writing. Some specific issues we address include canonicity, or how women's writing becomes a legitimate object of academic study, and how "major women authors" might be defined. In addition, we examine how social and cultural differences complicate the category of "woman" itself. This involves consideration of factors such as race, ethnicity, sexuality, nationality and class in addition to the category of gender.

Teachers with or without musical training enjoy this hands-on workshop, building and playing 30 simple international musical instruments from inexpensive materials. No musical or technical skills are required. The course is designed for the general kindergarten to 8th grade classroom teachers. Those who have musical training benefit from a fresh approach to familiar subjects, such as conducting composition, improvisation, band/orchestra performance and notation. Instruments to be made represent the four families of sound.

Workshop director and ethnomusicologist Craig Woodson of Cleveland, Ohio, is a nationally recognized educator and teacher of instrument making. In 1993 he completed a revolutionary new instrument-making project with 25,000 school children who played with the National Symphony Orchestra at the Kennedy Center. Two credit hours

July 18-22 Mon-Fri 4:30 p.m.-9:30 p.m. ALT B11

Directors: John Fairfield and Bob Cotter

This workshop examines the multifaceted historical relationship between movies and cities. The workshop should appeal to those interested in movies and/or cities, and teachers interested in enhancing their use of film in their curriculums. Several feature-length films and numerous movie clips are central to the course. The workshop begins with a discussion of motion pictures as an advance in human perception, an ability to see and understand things previously hidden. This perceptual advance was in many ways a product of urban experience in both Europe and America but it also had the potential for enhancing our understanding of urban life and urban structure. The workshop then examines the close relationship between America's inner cities and the development of the motion picture industry. The impact of movie images and movie discourse on American urban policy from the 1930s through the 1960s is the third major theme of the workshop. Finally, the workshop investigates film noir (a dark and highly stylized film genre typified by the hard-boiled detective story) as a way of understanding and misunderstanding cities. Tentative texts include Ross' *Working-Class Hollywood* and Christopher's *Somewhere in the Night: Film Noir and the American City*. Tentative films include "Metropolis," "Greedy," "Public Enemy," "City for Conquest," "Murder, My Sweet," "The Big Clock," and "Rear Window."

This workshop is an examination of the influence of Graeco-Roman mythology on the modern cinema. The course focuses on how the films viewed enhance the mythic stories being presented through artistic manipulation of visual images and sound. A primary goal for this course is to develop a rudimentary scheme for how one should "read" a film, by considering the film's director to be the author of the modern work through the use of visual and sonic elements as different from the original story. This "difference" depends not only on the director, but also on the period in which the film was made.

How easy it is for your well-spring to become exhausted by the world and have no sweet water left for yourself. Most of us are so engaged by life that we have precious little time to nurture, heal ourselves and experience our own joy. Come and reclaim your joy by experiencing your own creativity. Simply dealing with life in a more effective, inventive and fulfilling manner is living the creative process. Creative experience excites people and gives them a sense

of their own power. We explore the four directions of the medicine wheel, guided meditation, shamanic journeying, nature mandalas, drumming, fire ceremony and walking the labyrinth. Most of all, we do this in tune with one another, in mutual support, holistically, finding and basking in our harmony, balance and centeredness away from our more structured selves. "Sixties" America: 1945 to 2005

June 6-10 Mon-Fri 4:00 p.m.-9:30 p.m. ALT B11

Director: Robert Cotter

Taking issue with the idea that history comes in neat 10-year packages, this course places the period of social upheaval often called "the sixties" into a larger historical framework. We identify and analyze the movements and ideologies that preceded, overlapped and followed the 1960s in order to place the events of the decade into a purposeful context.

We examine the Cold War state, Vietnam, Watergate, and the cultural and the political polarization exacerbated by the 2004 Presidential election, among other historical benchmarks. The point is to define the historical precedents that provoked the events of the 1960s, and to show how the beliefs and actions of that decade continue to have a transformative effect on contemporary America.

In addition to historical documents, we make extensive use of other cultural artifacts, including literature, music, television programs and, in particular, the American films of the 1960s and 1970s.

explore ways in which diverse learners are *both different and similar* to what is defined as "the norm." The concept of what is "normal" provides a backdrop for the course as diversity is examined through a series of lenses: disabilities, gender, socioeconomics and environment. When students complete the course, their awareness, respect and positive responsiveness to diverse learners are expected to increase as indicated through their products.

This workshop is an intensive study of different learning theories and classroom practices demonstrated in modern films. This workshop is designed for teachers and/or interested participants who wish to develop their understanding of, and examine, various learning theories and teaching practices operant in schools today. Since the basis for group discussions are examples of learning theory and classroom practices demonstrated in modern films, an appreciation for modern films is crucial. Various excerpts from films have been selected because they provide examples of selected learning theories and teaching practices used in schools. Each film excerpt is paired with a different learning theory and/or teaching practice. Interest in, and enjoyment of, modern films and a desire to further ones knowledge of learning theories and teaching practices are the only requirements needed.

While the main focus of this workshop is on the examination of learning theories and teaching practices, participants are engaged in a reflective self-study of classroom practices. Participants are invited to reflect on their teaching methods, strategies and careers. They are asked to respond to writing prompts and use a reflective writing process to explore their beliefs and teaching practices in the classroom. They collect resources such as information about various theories and teaching practices and the philosophical underpinnings that support specific approaches to instruction.

This workshop includes, but is not be limited to, the following poetry forms.

- Psychoanalytic theory
- Behaviorism and social learning theory
- Cognitive developmental theory
- Information-processing theory
- Ethology
- Sociocultural theory
- Ecological systems theory

Director: Margery Shupe

This intensive course examines the child and adolescent with chronic illness and discusses treatment approaches from a multi-disciplinary or biopsychosocial intervention model. Shupe draws upon her extensive experience and observations from working in clinics, hospitals or in the field with children who have been diagnosed with such disorders as cancer, hemophilia, AIDS, diabetes, sickle cell anemia, endocrine/growth problems, cleft palate, genetic anomalies, mental health DSM-IV disorders, as well as children with multiple handicaps and disabilities. Emphasis is given to practical ways counselors and other mental health professions and teachers can build and maintain therapeutic relations with children who have been dealt this difficult challenge of handling a chronic or life-threatening illness. Additionally, this course gives special attention to identifying needs and assessing and treating families and siblings of children who have a chronic illness.

Writing is Power: A Writer's Workshop

ENGL 305-W1 (50626) Two credit hours

June 6-10 Mon-Fri 1:00 p.m.-5:00 p.m. ALT 216

Director: Alison Russell

Do you want to make your writing interesting, emphatic and lively? To teach others how to write effectively? Writing is Power focuses on how language works, offering new perspectives on stylistic issues, as well as on grammar and punctuation. Most people tend to equate grammar and punctuation with correctness, with rules set forth by scores of well-intentioned English teachers wielding red pens; rhetorical grammar, however, is about understanding the choices you make as a writer and the effects of those choices on readers. Do you know, for example, that words before commas receive greater stress than others in the sentence? (When you read that last sentence, did you emphasize "know"?) Do you know that using passive voice can sometimes be more effective than using active voice, which most of us have been taught to do? Students are required to complete brief assignments for each class and one longer paper based on the course materials.

*Limit: 12 participants Noncredit fee: \$195 ENGL 305-W1 (50627)
Suggested registration deadline: May 23*

■ Office of Instructional Technology Services (ITS)

Instructional technology services (ITS) supports Xavier's teaching and learning activities by facilitating the integration of innovative learning technologies into Xavier's learning environments.

In collaboration with Xavier's administrative offices and academic departments, ITS offers strategic direction and leadership to help faculty integrate new and traditional information tools into academic programs and courses. The primary objective is to create student-centered learning opportunities that engage the students as active participants in the learning process.

Technology resources and services provided by ITS include distributed classroom support, open labs and interactive classrooms, instructional design and courseware development, technology integration assistance, the development of online and distance learning environments, customized training resources for faculty and tutorial assistance for students. ITS is located in the basement of Alter Hall. Visit our web site www.xavier.edu/its for additional information on our services.

■ Dining Service

During the summer, Xavier's main dining facility is the retail food court operation located in the Gallagher Center. In addition, the Hoff Student Dining Hall is used primarily for conference groups and summer camps. However, anyone may purchase the cafeteria-style meals on a pay-as-you-go basis when this facility is in operation. The Hoff Student Dining Hall is located in the Cintas Center. For more information about dining service or the hours of operation, call 513 745-4874.

■ ALL Card (Student ID)

The student identification card, ALL Card, is required for all full-time and part-time students. The card is the official University identification and must be in your possession while on campus. The card services include access to MyXU campus portal, the library resources (both on- and off-campus), access to student online services, purchase of athletic and special event tickets and facilities access.

In addition to serving as your identification card for easy access to campus facilities and programs, the ALL Card is used as cash to pay for on-campus services such as bookstore, food services, copying, library fees, post office, Xavier document center, all vending machines and off-campus XU-LD calling services. The ALL Card technology even includes the student's ability to integrate US Bank's complete banking, as well as Internet banking services with Xavier's financial services program. The system eliminates issues related to multiple cards for campus access and funds management. Convenience, simplicity and security...one card does it all. Questions regarding ALL Card services should be referred to the assistant director for auxiliary services and support at 513 745-3675.

This card can be obtained at the ALL Card center, 270 Gallagher Student Center, 513 745-3374.

■ Library Services

The University library provides facilities, resources and services to support the teaching and learning mission of Xavier University. Located on the academic mall, the library contains the reference, audiovisual, music, browsing, microform and special collections, as well as periodicals, archives and the Lodge curriculum resource center. In addition to the various collections, this facility provides study, lounge, conference and instruction space. It houses photocopy and multimedia equipment and computer workstations. For members of the Xavier community, the library provides on-site and off-campus access to XPLORE, the library's online catalog, more than 220 research databases, more than 25,000 electronic journals and the World Wide Web. The library's resources and services are further enhanced by participation in three consortia: the Association of Jesuit Colleges and Universities, the Greater Cincinnati Library Consortium and the Ohio Library Information Network.
